

RECROSS

DUAL LUMEN OTW MICROCATHETER

The Frontline Approach for Antegrade CTO

 IMDS

Don't Let CTO Complexity Slow You Down

As degree of complexity increases in antegrade CTO crossing, maintaining control and forward progress often requires multiple devices and technique changes, adding complexity and slowing progress.

Technical Success¹
in Antegrade (ADA) CTO

RECROSS

One Solution.
Dual Access.
Forward Progress.

ReCross dual-lumen OTW microcatheter delivers the control, support and redirection needed to stay on strategy - without device exchange.

FIRST WIRE GOES SUBINTIMAL

SECOND WIRE PENETRATION

SECOND WIRE GOES SUBINTIMAL

CROSSING OF THE CTO BODY

¹.IMDS data on file

True Distal Tip & Exit Port Visibility

Radiopaque soft tip and exit ports enable 360° visualization for precise positioning and predictable direction.

Removable stylet improves overall pushability.

ReCross Increases Procedural Efficiency & Cost Control in Complex CTO PCI (N=118)²

Only 3 guidewires needed on average for successful CTO crossing

Standard guidewire success rate with ReCross combination (%)

47.5%	Gaia® (Asahi Intecc)
27.1%	Gladius® (Asahi Intecc)
13.6%	Fielder® (Asahi Intecc)
7.6%	Confianza® (Asahi Intecc)
0.8%	Sion® (Asahi Intecc)

Successful CTO strategies (antegrade crossing) with ReCross (%)

47%	Parallel Wiring
29%	Antegrade wire escalation
18%	Antegrade dissection re-entry
6%	Other / none successful

Simplify Everyday Complexity

Routine cases can quickly become complex. IMDS delivers precision-engineered solutions built around intuitive workflows – making PCI more efficient, safe, and reliable.

Versatility Across Complex CTO Scenarios

RECROSS

ReCross' dual-lumen 360° design enables support to perform multiple advanced techniques from a single microcatheter.

PRECISE SIDE BRANCH TARGET

SUBINTIMAL REDIRECTION

HEMATOMA DECOMPRESSION

Model	Guiding Catheter Compatibility	Guidewire Compatibility	Usable Length	Distal Shaft Profile
RC1414025	5F	0.014"	140 cm	2.3F/3.3F
