Everyday Complexity Demands More from Your Workhorse Guidewire

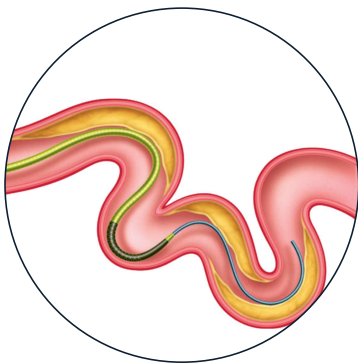

Increased complexity and calcification can limit a guidewire's ability to maneuver through channels without adding procedure time and resources.

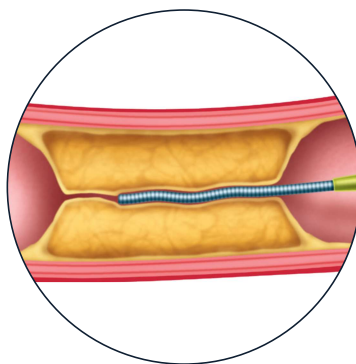

MICRO Rx

Increase Wire Support & Control with Rx Simplicity

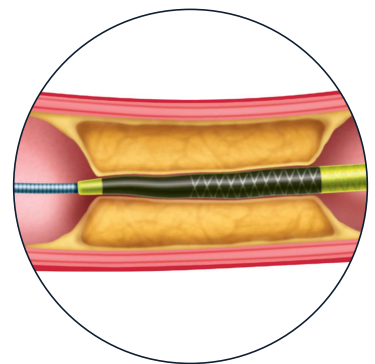

As the first skeleton backbone rapid-exchange microcatheter, Micro Rx delivers the added wire support and control required to manage everyday complexity and improve crossability in tortuous or highly stenosed lesions.

TECHNOLOGY

The only continuous laser-cut metal reinforcement, customized to optimize:

Optimal Pushability

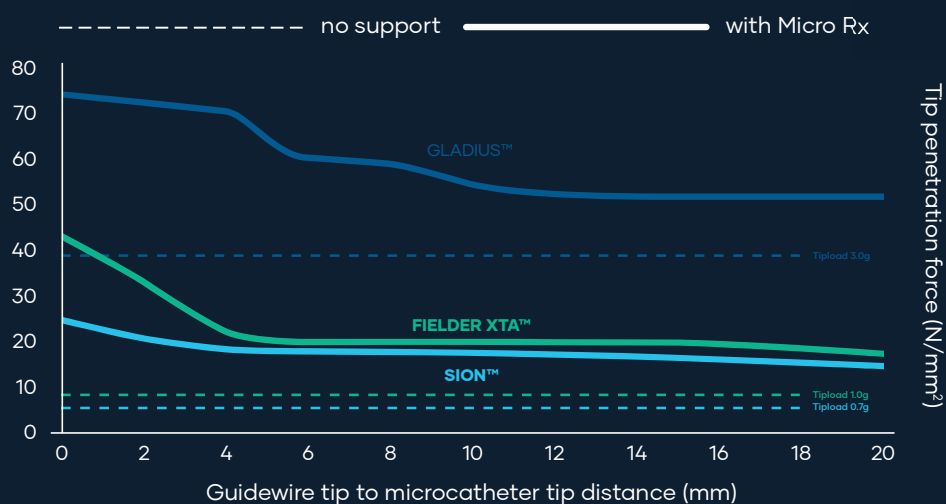

Targeted Flexibility

Lumen Integrity

Ultra low leading-edge profile (0.44 mm)
with highest lesion penetration force.

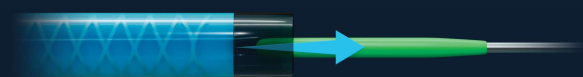

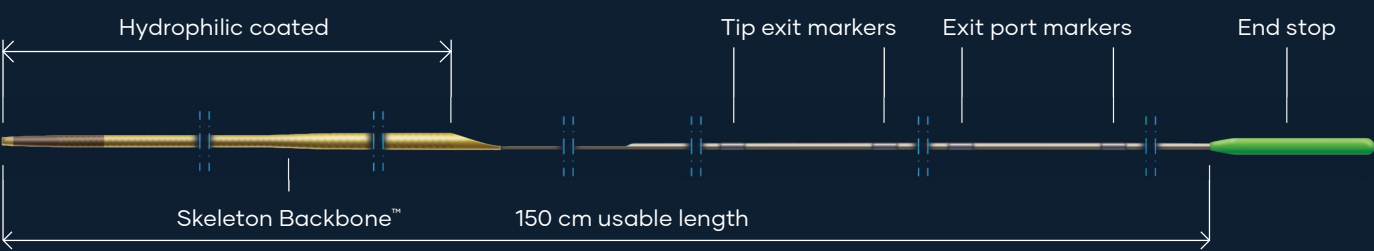

Micro Rx Significantly Increases Guidewire Penetration Force¹

Simplify Everyday Complexity

Routine cases can quickly become complex.
IMDS delivers precision-engineered solutions built around intuitive workflows – making PCI more efficient, safe, and reliable.

Need More Support? No Problem.

Our novel end stop design enables seamless guide extension loading, while maintaining position.
